Manifesto of Just Cities

The city that we want

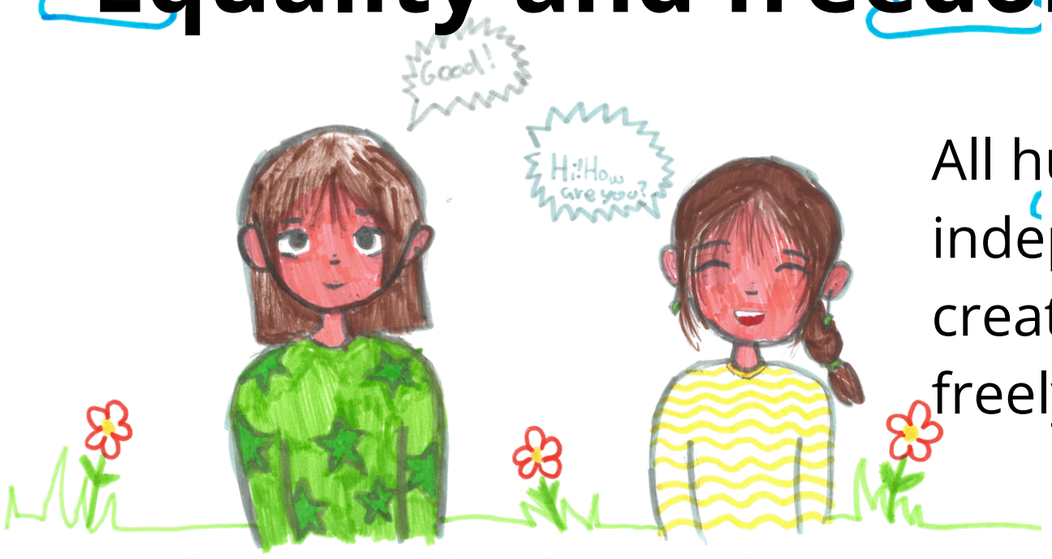

We commit to improve the world, creating an ecological and biodiverse city. We want to live in a city where money is used for things like health and education that works for everybody.

A greener tomorrow, a cleaner today

We want to live in a city that is environmentally friendly. We want green spaces where animals, plants and humans take care of each other,

Equality and freedom of opinion

All human beings must have the same rights, independently of their conditions. We commit to creating a place where everyone can express themselves freely without fear of judgement, and can live safely.

Accessible for all, inclusive of all

We want to live in a world where everyone is happy and not judged based on their background and race. We also want to live in a world where it is easy to access basic needs and people in society are responsible for one another.

Safety for everyone

We want to live in a safe city, with no crimes or violence; that respects its citizens and their rights no matter their conditions. To live in a safe worldd where potholes are fixed, our streets have lights and pedestrians feel safe. We commit to protect and take care of the world together.
